

Leaf Prints

The colours of the leaves this time of year is incredible! It is a great opportunity to take a closer look at those fallen leaves. Making prints is a fun way to see shapes, lines and patterns. Can you find out the name of the leaves? The Woodland Trust 'Nature Detectives' have lots of resources online. www.woodlandtrust.org.uk/naturedetectives

Nature Collage

When you are out and about over half term see what natural items you can find. Make a collage, how many different shades of colours can you find?

Art and Design Technology Home Learning Half Term October 2018

Here are a few ideas you might like to try over half term. Please do take photos or bring in your creations to share!

Creative Pumpkins & Squash

After half term we will be inspired by Pumpkins and Squash to create prints. What would you paint on a Pumpkin or Squash? You could think of, draw, paint or even find a photo of a design that inspires you.

Wrapping Paper Printing

We will be continuing with our ASDAN print module up until Christmas. You could try out making prints and creating patterns for wrapping paper. Bring in your designs to share.

The Arctic

Form LH are learning about the Arctic after half term. You could make an Arctic world, make a model of an Arctic creature or find pictures or photos that we could then make from in the art room.
